Professional Summary

Computer Engineering student with hands-on experience in software development, cloud technologies, and machine learning. Successfully led 5+ workshops and developed AI-driven and accessibility-focused solutions tested and approved by over 100 users. Winner of national and international competitions, including Smart India Hackathon 2023 and LASC 2023. Strong problem-solving and leadership skills with a track record of delivering high-impact projects.

Education

Bachelor of Engineering (B.E.) in Computer Engineering

NBN Sinhgad Technical Institutes Campus, Pune

GPA: 8.31/10

Technical Skills

Languages & Tools: Python, C++, Java, HTML, CSS, JavaScript, SQL, Arduino C

Frameworks & Libraries: OpenCV, PyTorch, LAVIS, React, Tailwind CSS, WordPress, Elementor, Framer Motion, GSAP

Technologies: Machine Learning, Computer Vision, API Testing, Cloud Computing (Google Cloud Platform, AWS EC2), Selenium WebDriver,

Concepts: OOP, Image Classification, Human Body Segmentation, Real-Time Processing

Soft Skills: Public Speaking, Teaching (100+ students), Written Communication, Team Collaboration

Experience

Cloud Lead – Google Developer Student Club (GDSC), NBNSTIC, Pune

Aug 2022 – Present

- Conducted 5+ cloud computing workshops, training over 150 students in Google Cloud Platform and Generative AI.
- Organized and hosted events with 200+ attendees, increasing club engagement by 10%.
- Managed speaker coordination, event logistics, and curriculum development.
- Interviewed 15+ candidates for the next generation of core team members.

Payload Engineer – STES Rocketry Team, Latin American Space Challenge (LASC) 2023, Brazil

May 2023 – Sep 2023

- Designed and tested an Acoustic Levitator payload, contributing to the successful launch of a 1KM apogee SRAD rocket.
- Conducted 10+ simulation tests, improving payload sensitivity by 15% while maintaining structural integrity.
- Presented at the international podium session representing India among 35+ global teams.

Freelance Web Developer

Jan 2025 – Present

- Delivered 3+ websites using PHP, React, Tailwind CSS, and WordPress.
- Delivered freelance projects within tight timelines, incorporating client feedback across 10+ revision cycles.
- Utilized CSS frameworks including Tailwind CSS and animation libraries like GSAP for enhanced user experience.

- Integrated a payment gateway managed SQL databases.
 - Deployed projects on platforms like Hostinger and WordPress.
-

Projects

AJFO – NGO Platform

React, PHP, Tailwind CSS, GSAP, MySQL, Framer Motion, PhonePe, Hostinger | Feb 25 – Present

- Developed a responsive NGO website with donation capabilities, integrating a PhonePe payment gateway and backend verification via PHP.
- Built a custom CMS for blog content with full CRUD functionality using React and MySQL, simplifying content updates for non-technical users.
- Designed a responsive interface with GSAP and Framer Motion, enhancing engagement and reducing friction across devices.

AI-Based Image and Video Captioning for Accessibility

Python, Machine Learning, OpenCV, Image Classification, LAVIS, PyTorch | Nov 2024 – June 2025

- Developed a real-time image captioning system with 90% accuracy using BLIP and LAVIS.
- Implemented speech output for captioned video content; tested with 25+ sample scenarios.
- Collected and labeled 700+ images to improve tagging and accessibility features for visually impaired users.

Project Lakshavya – Smart India Hackathon Winner

Python, Computer Vision, Machine Learning, Human Body Segmentation | Oct 2023 – Dec 2023

- Designed a real-time AI-based training simulator to assist 100+ anti-hijacking personnel.
 - Integrated human body segmentation with 90%+ accuracy under dynamic lighting conditions.
 - Achieved 1st place among 10+ finalist teams in the Smart India Hackathon 2023, Chittoor.
-

Awards & Certifications

 **Winner**, Smart India Hackathon 2023 Grand Finale – Chittoor, Andhra Pradesh

- Emerged Victorious at the hackathon with Project Lakshavya, developed for the ministry of defence.
- Developed a system to assess performance of trainee sky marshals.

 **Podium Presenter**, Latin American Space Challenge 2023 – Cape Canavial, Brazil

- Presented in front of 15+ international teams.
- Designed, Built, Presented and Launched an Acoustic Levitator using a 1km SRAD Rocket

 **Google Cloud Facilitator**, Google Developer Students Club – Pune

- Awarded a Cloud Facilitator recognition certificate for conducting Google Cloud Study Jams.
- Guided 150+ students on the use of Google Cloud Platform over the course of 5+ workshops

 **Deloitte Virtual Experience (Forage)**, Deloitte Australia

- Completed a real-world Python task involving telemetry data transformation.
- Drafted a proposal for a real-time manufacturing dashboard.
